Findings of Fact & Conclusions of Law

Authorized representative Lance Chebin appears for the Respondent and Inspector Leah Smith appears for the NYC Department of Environmental Protection (DEP). Respondent was charged with a violation of Rule 24-163 of the Administrative Code for the idling of a motor engine for more than three minutes. For the reasons stated below, the summons is sustained.

The summons states that the Respondent caused or permitted the idling of a motor vehicle while parked, standing or stopped. As per DEP records, the citizen observed a truck with IN license plate 282848481 idling for longer than three minutes on 7/17/23 8:21:06 to 8:25:23 a.m. on West Broadway between 80th and 81st Streets. The DEP submits photographs of the vehicle, an affirmation of the citizen's complaint, the redacted citizen's complaint and a video of the vehicle sitting idle with the

motor vehicle on. The Inspector adds that the vehicle's engine is audible, there is no processing device present, a refrigeration unit exists but has its own fuel source and does not require the motor to be on in order to operate. The video shows the videographer walking around the vehicle, showing all sides of the truck.

The Respondent's representative denies the allegations and states that the vehicle's refrigeration system required the motor to be on. Respondent does not offer any documentary evidence in support thereof.

Rule 24-163 of the Administrative Code states that No person shall cause or permit the engine of a motor vehicle, other than a legally authorized emergency motor vehicle, to idle for longer than three minutes, except as provided in subdivision (f) of this section, while parking as defined in section one hundred twenty-nine of the vehicle and traffic law, standing as defined in section one hundred forty-five of the vehicle and traffic law, or stopping as defined in section one hundred forty-seven of the vehicle and traffic law, unless the engine is used to operate a loading, unloading or processing device. When the ambient temperature is in excess of forty degrees Fahrenheit, no person shall cause or permit the engine of a bus as defined in section one hundred four of the vehicle and traffic law to idle while parking, standing, or stopping (as defined above) at any terminal point, whether or not enclosed, along an established route. I find that the Respondent violated this rule. The evidence submitted by the DEP is clear, credible and convincing. I credit the witness's observations of the scene and find his/her video to be credible. It is clear from the video that the truck was sitting with its motor on for longer than the requisite three minutes. I do not credit Respondent's representative's self-serving statement that the motor needed to be on for the refrigeration to work. Respondent does not submit any documentary evidence in support of this defense. I do not find this defense credible As such, the summons is sustained.
