

structure unit, from March 2025 to May 2025 (Resp. Exh). In it, Claudia Misi, RA, petitioner's Director, Facades and Local Law Structural Engineering Compliance, states on May 20, 2025 that the petitioner will start the withdrawal of prosecution request for the summons and deactivate the associated parking structure ID. She cautions that this is a long process. The petitioner, after checking with petitioner's unit, did not object to the respondent's motion.

Accordingly, the respondent's motion is granted. I find the respondent has shown that a parking structure initial observation report is not needed here as there is no existing parking structure at this location. The summons is dismissed.
